27 Oct 2021 (Wed)

3:30-4:30pm

Abstract

In this webinar you will learn more about how you can automate your protein purification using ÄKTA™ chromatography systems. We will go through the different stages of the purification and talk about sample application, monitoring the run and how to collect the purified protein. Some application examples will be shown as well.

Speakers

Lotta Hedkvist, Global Product Manager, Cytiva

Lotta has been with Cytiva for 20 years. During that time, she helped to develop ÄKTA chromatography systems and UNICORN software. Lotta was a co-author of the 'Instrument Management Handbook for ÄKTA™ Laboratory-scale Chromatography Systems'. She has also supported customers as ÄKTA system specialist within Scientific Support.

Abhijit Parkhe, Global Product Manager, Cytiva

Abhijit is the global product manager for ÄKTA pure and the previous generation ÄKTAs including ÄKTAexplorer, ÄKTApurifier, and ÄKTAprime plus. He has been with Cytiva in different roles with the lab-scale ÄKTA global product management team since 2015.
