

## **Cytation C10 – A Modular Confocal Imaging Reader for your Research Laboratory**

**20 Feb 2024 (Tuesday)**  
**10 - 11am**

**NUS, MD1-05-03K -  
MD1L5 - Seminar Room**

Register now

Agilent BioTek Cytation C10 Confocal Imaging Reader combines automated digital confocal and widefield microscopy with conventional multi-mode microplate reading in a compact, modular design. The spinning disk confocal module provides exquisite detail and resolution in a wide variety of sample types that benefit from confocality. Its variable bandwidth monochromator-based plate reading provides fluorophore specificity and sensitivity. Come join us in this seminar to learn how combining confocal and widefield imaging with multi-mode detection can add efficiency to your lab workflows and help increase productivity.

Speaker:  
**Chin Chieh LOH (JJ)**  
*Cell Analysis Field Application Scientist  
South Asia Pacific, Agilent CrossLab Group  
Agilent Technologies Singapore (Sales) Pte. Ltd.*
